

Right stock, fewer expiries, faster checkout.

A pharmacy POS for the counter, inventory and stock control behind it, and AI automation that keeps customers coming back.

SOUND FAMILIAR?

Expired stock written off

Near-expiry batches spotted too late to return or sell.

Stock-outs on fast movers

Reordering by memory; customers go elsewhere.

Slow billing at peak hours

Manual entry, long queues and pricing errors.

Batch & expiry by hand

Registers and spreadsheets that never match the shelf.

Orders & refills lost in chats

Customer messages answered late, or missed.

Stock that never adds up

System stock and shelf counts drift apart.
